Hand protection for **every hazard**

Suppe

Why Superior Glove

Protection workers want to wear

Workers shouldn't have to choose between comfort and safety. We innovate to fit the protection they need into comfortable safety gloves and other PPE they'll want to wear.

North American innovation

We research, design, and test our products at our Canadian headquarters to ensure safety, effectiveness, and quality.

Injury reduction education and training

We offer free resources and services to help companies develop safety programs that eliminate and reduce injuries through non-PPE changes that minimize workplace hazards and improve safety culture.

Extreme Cut

What you need to know about extreme cut protection

Gloves and sleeves that provide extreme cut resistance are designed for tasks such as meat processing, industrial blade maintenance and changing, pulp and paper maintenance, glass manufacturing, heavy metal stamping, and glass installation.

When looking for extreme cut protection levels on gloves, look for the following ANSI cut levels represented by the following icons:

Extreme Cut Protection **Level A9**

EXTREME CUT PROTECTION | LEVEL A9

String Knit

Featuring the industry's maximum cut resistance

TENACTIV™ S18TAXFN | 6 - 12

Hi-viz ultra-thin maximum cut protection with excellent sense of touch and foam nitrile palm coating for better wet grip

TENACTIV™ S18TXLX | 5 - 12

Maximum cut resistance made from advanced TenActiv™ engineered yarn for abrasive material and glass handling plus latex palms for dry grip

TENACTIV™ S18TXLXMP | 7 - 12

Maximum hypodermic and cut-resistant palms with better range of motion than traditional puncture protection

TENACTIV™ S13TAWFN | 7 - 12

Maximum cut protection with foam nitrile palm coating for better wet grip

MADE IN THE AMERICAS

TENACTIV™ STAGCXPU | 5 - 12

Maximum cut protection with palm coating for better dry grip and touch sensitivity

TENACTIV™ STAGLXPB | 6 - 11

Maximum hypodermic puncture resistant palms with latex coating for grip and maximum cut protection

CONTENDER™ SKGCXPS | XS - 2XL

Silicone-free maximum cut protection for tasks that don't require extra grip

MADE IN THE AMERICAS

TENACTIV™ STXPNRPVB | 5 - 12

Hi-viz, impact-resistant gloves with maximum cut protection and micropore nitrile palms for grip plus padded palms for vibration dampening

EXTREME CUT PROTECTION | LEVEL A9

Leather

Featuring the industry's maximum cut resistance

ENDURA® 378CXGOB | S - 3XL

Maximum cut-resistant leather gloves that resist water and liquid penetration

ENDURA® 378GCXVB | S - 3XL

Maximum cut resistance that repels water and liquids plus level 2 impact protection

ENDURA® 378GOBTX | S - 3XL

Maximum cut-resistant leather gloves with short cuffs plus water and liquid resistance

ENDURA® 399GCXL5 | S - 3XL

All-round fabrication gloves with maximum cut protection and ANSI 2 heat resistance for material handling

EXTREME CUT PROTECTION | LEVEL A9

Specialty

Featuring the industry's maximum cut resistance

SUPERIOR® MMG | XS - 2XL

Chainmail gloves with maximum cut protection

EXTREME CUT PROTECTION | LEVEL A9

Sleeves

Featuring the industry's maximum cut resistance

TENACTIV™ KPSTA18TH | S - 2XL

Food safe sleeves with maximum cut protection and inner bicep elastic and grip to stay in place

14", 18", tubular cut

MADE IN THE AMERICAS

TENACTIV™ KTX1HV | S - 2XL

Hi-viz maximum cut-resistant sleeves that are cool-to-the-touch with inner bicep elastic and grip to stay in place

12", 18", 22", tapered cut, available with or without thumbhole

MADE IN THE AMERICAS

TENACTIV™ KTX1T | S - 2XL

Breathable single layer sleeves with maximum cut resistance and inner bicep elastic and grip to stay in place

18", 22", tapered cut, available with or without thumbhole

MADE IN THE AMERICAS

EXTREME CUT PROTECTION | LEVEL A9

Apparel

Featuring the industry's maximum cut resistance

SUPERIOR® GSSTAP | S - 3XL

Cut-resistant sweater with additional cut protection for neck and arms

The New Standard of Dexterity
Level A9 | The New Standard Of Dexterity

The new standard of dexterity

Experience the perfect blend of safety and comfort with our S21TX line of TenActiv™ gloves. They not only provide maximum cut protection but are also designed to feel like second skin, allowing for unmatched hand mobility and breathability.

TENACTIV™ S21TXUFN | 5 - 12

Our thinnest food safe maximum cut protection with unmatched hand mobility and breathability plus foam nitrile palm coating for better wet grip and touchscreen compatibility

TENACTIV™ S21TXUGFN | 5 - 12

Our thinnest food safe maximum cut protection in hi-viz green with unmatched hand mobility and breathability plus foam nitrile palm coating for better wet grip and touchscreen compatibility

TENACTIV™ S21TX | 5 - 11

Our thinnest food safe maximum cut protection with unmatched hand mobility and breathability plus touchscreen compatibility

TENACTIV™ S21TXPN | 5 - 12

Our thinnest food safe maximum cut protection with added abrasion resistance for durability plus micropore nitrile palm coating for better wet grip and touchscreen compatibility

TENACTIV™ S21TXUFNLTC | 5 - 12

Our thinnest maximum cut protection with reinforced thumb crotch for durability plus foam nitrile palm coating for better wet grip and touchscreen compatibility

TENACTIV™ S21TXUFNOF | 5 - 12

Our thinnest open finger maximum cut protection with unmatched hand mobility and breathability plus foam nitrile palm coating for better wet grip and touchscreen compatibility

TENACTIV™ SL21TX | S - 2XL

Our thinnest and most dexterous maximum cut-resistant sleeves for protection and comfort
18", tapered cut, available with thumbhole

Extreme Cut Protection Level A8 & A7

EXTREME CUT PROTECTION | LEVEL A8 & A7

String Knit

TENACTIV™ STXLPNRVB | 5 - 12

Hi-viz cold-rated extreme cut resistance with impact protection for high hazard environments

TENACTIV™ S18TAXPUE | 6 - 12

Economic choice for extreme cut protection and dexterity with polyurethane palm coating for better dry grip

TENACTIV™ SBTAKLP | S - 2XL

Extreme cut protection with reinforced leather palms for durability

⚠ WARNING: Known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, go to P65warnings.ca.gov

TENACTIV™ STACXPVRT | 5 - 12

Extreme cut protection with reinforced thumb crotch and non-marring micropore palm coating for better wet grip plus touchscreen compatibility made with material with biodegradable additive

TENACTIV™ STXPNRVB | 5 - 12

Orange hi-viz bumpers with extreme cut protection plus micropore nitrile palm coating for better wet grip

DEXTERITY® S18TALNPN | 6 - 12

Double dipped string knit gloves with extreme cut protection and maximum abrasion resistance

EXTREME CUT PROTECTION | LEVEL A8 & A7

Food Safe

Washable, bleachable, and preshrunk to maintain size. Antimicrobial with blue yarn for better contamination detection.

SURE KNIT™ S10SXB | XS - 2XL

Food safe antimicrobial extreme cut-resistant gloves that are thicker for more cushioning plus blue yarn for contamination detection

SURE KNIT™ S10SXBDB | XS - XL

Food safe, antimicrobial extreme cut-resistant gloves with added protection for deboning plus blue yarn for contamination detection

SURE KNIT™ S13SXB | XS - 2XL

Food safe antimicrobial extreme cut-resistant gloves with blue yarn for contamination detection

MADE IN
THE AMERICAS

SURE KNIT™ SLSXB | ONE SIZE

Food safe antimicrobial sleeves with extreme cut protection plus inner bicep elastic and grip to stay in place

9", 18", 21", 24", tubular cut, available with or without thumbhole

Microfiber ErgoHyde palms that provide more grip than typical leather with extreme cut resistance and impact protection plus water and liquid resistance

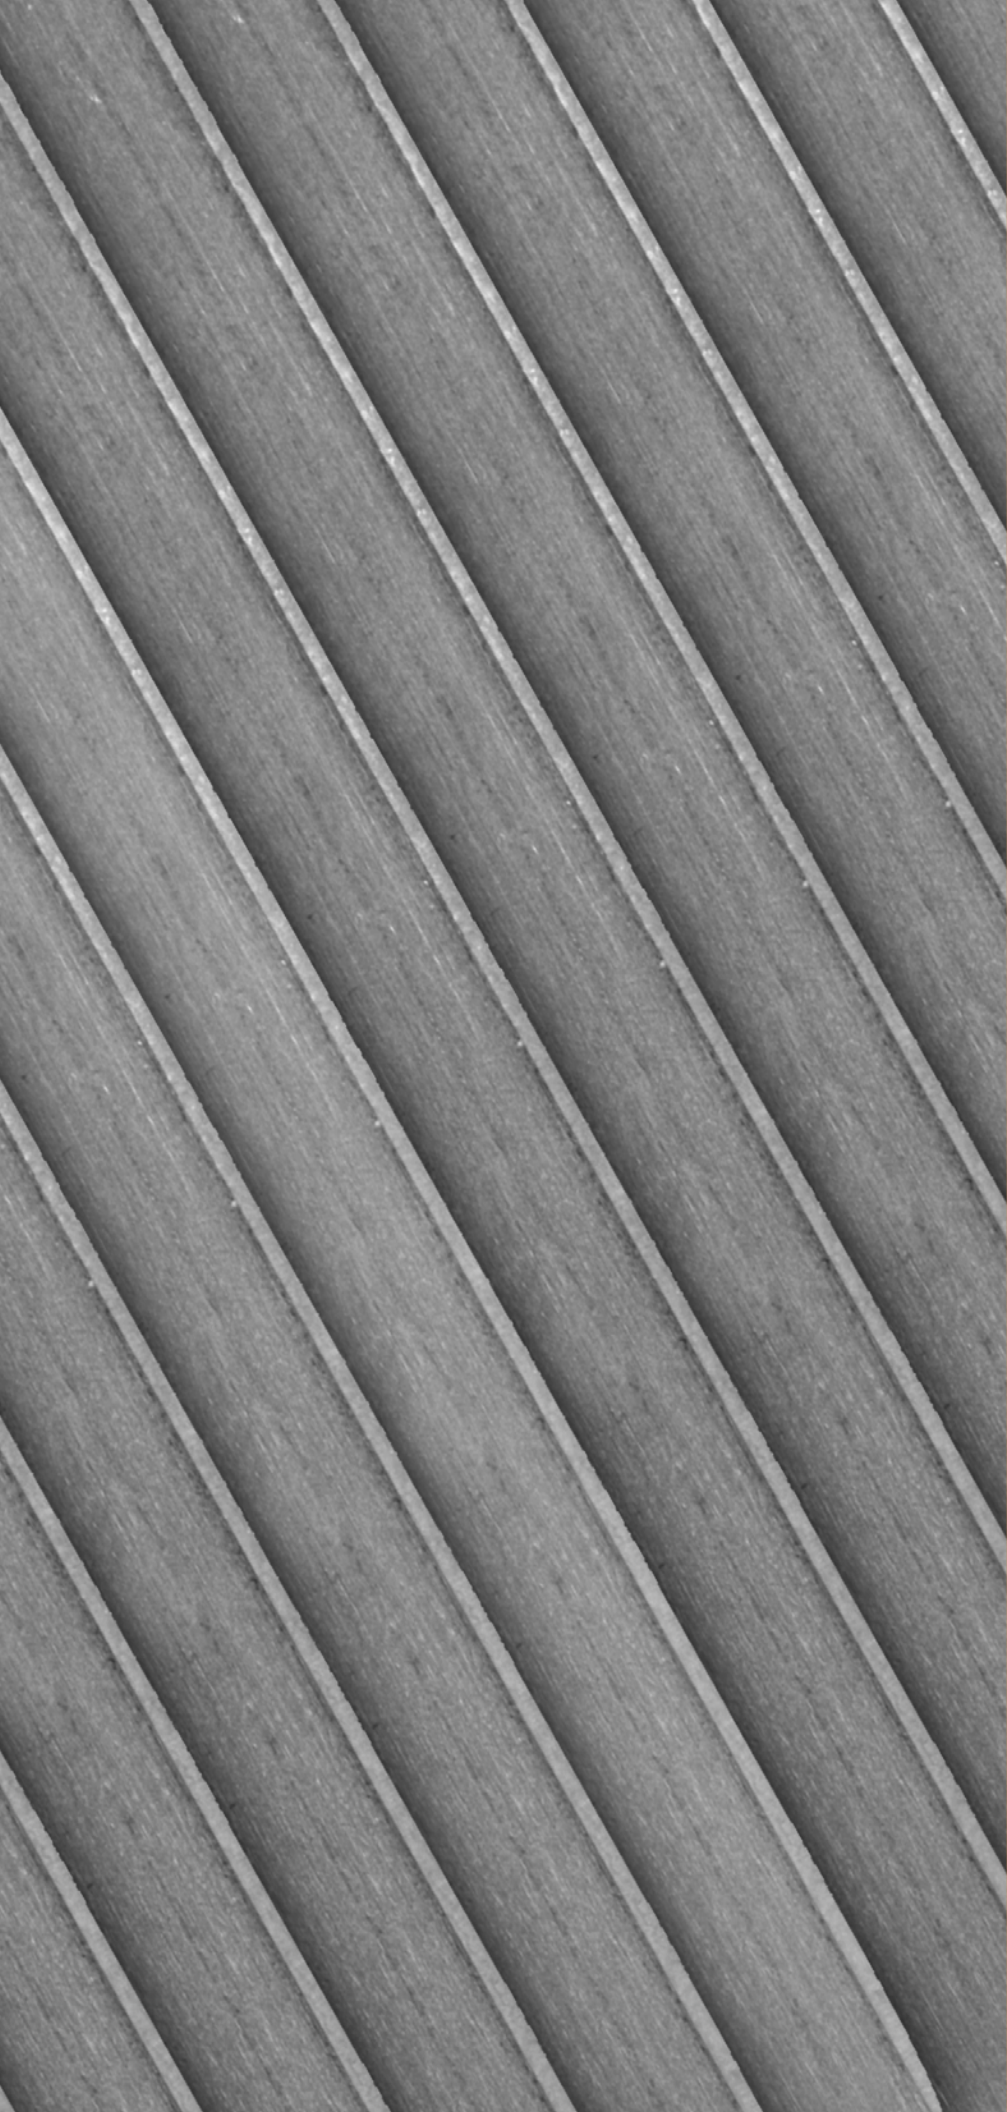

Leather ErgoHyde palms that provide more grip than typical leather with extreme cut resistance and impact protection plus water and liquid resistance

High Cut

What you need to know about high cut protection

Gloves and sleeves that provide high cut resistance are designed for tasks such as oil & gas drilling and processing, automotive and aerospace manufacturing / assembly, HVAC manufacturing, recycling sorting, and metal stamping.

When looking for high cut protection levels on gloves, look for the following ANSI cut levels represented by the following icons:

High Cut Protection **String Knit**

HIGH CUT PROTECTION | STRING KNIT With Palm Coating

TENACTIV™ STAGPN | 5 - 12

High cut resistance with micropore nitrile palm coating for better wet grip

TENACTIV™ STAGHVPN | 5 - 12

Hi-viz high cut resistance with micropore nitrile palm coating for better wet grip

EMERALD CX® SCXPNTFC | 6 - 11

High cut resistance with micropore nitrile double-coating for use in wet and oily conditions that don't involve full submersion

EMERALD CX® S13CXPNT | 6 - 11

Silicone-free gloves with high cut resistance and ANSI 2 heat protection plus micropore nitrile palm coating for better wet grip

TENACTIV™ STAGPNVPI | XS - 3XL

High cut resistance with padded palms for vibration dampening and comfort plus micropore nitrile palm coating for better wet grip

TENACTIV™ S18TAPN | 6 - 12

High cut resistance that is softer than typical cut protection and will not irritate skin for more comfortable wear over long periods of time

TENACTIV™ S13TAXFN | 6 - 12

High cut-resistant 13-gauge knit gloves with foam nitrile palm coating for better wet grip

EMERALD CX® S10NXFN | 6 - 12

High cut resistance with foam nitrile palm coating for better wet grip

TENACTIV™ STAGCTPU | 6 - 12

High cut-resistant gloves that tear away if caught in fast-moving rotational equipment to avoid hazardous snags

TENACTIV™ STAGXPU | 5 - 12

Comfortable everyday 13-gauge gloves with high cut resistance plus polyurethane palm coating for better dry grip

TENACTIV™ STAFGPU | 5 - 12

Durable everyday 13-gauge gloves with high cut resistance and polyurethane palm coating for better dry grip

TENACTIV™ STAGHVPU | 5 - 12

Hi-viz high cut-resistant gloves with polyurethane palm coating for better dry grip and touch sensitivity

TENACTIV™ STACXPURT | 5 - 12

Maximum abrasion resistance with reinforced thumb croch for high durability plus non-marring polyurethane palm coating for better dry grip

DEXTERITY® S10LXPB | 6 - 11

Food safe gloves with palms that provide maximum hypodermic puncture resistance and high cut protection plus latex coating for grip

EMERALD CX® SCXTAPVC | S - 2XL

Cut-resistant cold protection with PVC palm coating that won't stiffen in cold temperatures

CONTENDER™ SPGRK2D | S - 2XL

High cut resistance and ANSI 3 heat protection with dotted PVC palm coating to balance flexibility, breathability, and grip

EMERALD CX® S13CXSI | 6 - 12

High cut-resistant, non-marring gloves with adhesive-resistant and liquid-resistant silicone palm coating plus ANSI 3 heat protection

DEXTERITY® SKG/PXNE | 6 - 11

Arc flash-rated cold protection with high cut resistance and neoprene palm coating for steady grip

EMERALD CX® S13CXLXI | 6 - 11

Thin ANSI 4 heat-resistant non-marring gloves with cut protection and adhesive resistance for handling hot objects

EMERALD CX® S13CXLX | 7 - 11

High cut-resistant gloves with latex palm coating for secure dry grip

Moderate Cut

What you need to know about moderate cut protection

Gloves and sleeves that provide moderate cut resistance are designed for tasks such as light sheet metal stamping, sheet metal handling, HVAC assembly / installation / maintenance, construction framing, glass handling, and bottling line operation.

When looking for moderate cut protection levels on gloves, look for the following ANSI cut levels represented by the following icon:

Moderate Cut Protection

String Knit

MODERATE CUT PROTECTION | STRING KNIT With Palm Coating

DEXTERITY® S13KGPN | 5 - 12

Cut resistant with micropore nitrile palm coating for better wet grip plus touchscreen compatibility

DEXTERITY® SKFG2DFT | 6 - 11

Cut resistant with PVC dotted palms and micropore nitrile coated fingertips to balance flexibility, breathability, and grip

TENACTIV™ S13TANT | 5 - 11

Knit gloves with moderate cut protection and specially formulated durable nitrile palm coating that repels oils, solvents, and water

MADE IN
THE AMERICAS

TENACTIV™ S18TAFGNT | 5 - 11

Ultra-thin yet durable silicone-free gloves with specially formulated nitrile palm coating for great wet and dry grip

 |
 

MADE IN THE AMERICAS

DEXTERITY® S13KFGFNT | 5 - 12

Cut resistant with foam nitrile palm coating for better wet grip plus touchscreen compatibility

 |
 

TENACTIV™ STAFGFNT | 5 - 12

Comfortable cut-resistant knit with foam nitrile palm coating for better wet grip plus reinforced thumb crotch and touchscreen compatibility

TENACTIV™ S18WTFN | 7 - 12

Waterproof gloves with moderate cut protection plus foam nitrile palm coating for better wet grip

TENACTIV™ S18WTLFN | 6 - 12

Cut resistance with waterproof cold protection plus foam nitrile palm coating for better wet grip

DEXTERITY® SKFGFNLTC | 6 - 12

Cut resistant with foam nitrile palm coating for better wet grip plus leather thumb patch to reinforce critical wear areas

TENACTIV™ STAGFNP | 6 - 11

Cut resistant with foam nitrile palm coating for better wet grip plus leather thumb patch and palm padding to reinforce critical wear areas

DEXTERITY® S13KFGPU | 5 - 12

Cut resistant with non-marring polyurethane palm coating for better dry grip

TENACTIV™ STAGBPU | 5 - 12

Black knit gloves that hide dirt and stains with moderate cut protection plus polyurethane palm coating for better dry grip
Made with material with biodegradable additive

TENACTIV™ S18TAFGPU | 5 - 12

Ultra-thin with moderate cut protection plus polyurethane palm coating for better dry grip and touch sensitivity

COOL GRIP® SKPX/PSS | S/M - 2XL/3XL

Maximum ANSI 5 heat resistance and moderate cut protection with striped silicone palm coating to increase grip, heat resistance, and flexibility

CONTENDER™ SPGC2D | XS - XL

Cut-resistant knit with ANSI 2 heat protection plus dotted PVC palm coating to balance flexibility, breathability, and grip

MODERATE CUT PROTECTION | STRING KNIT Without Palm Coating

TENACTIV™ S18TAFG | 4 - 11

Ultra-thin dexterous gloves with moderate cut resistance

CONTENDER™ SPGC | XS - XL

Cut resistant in a thicker 7-gauge knit for more cushioning and increased durability

COOL GRIP® SPGC/A | S - 2XL

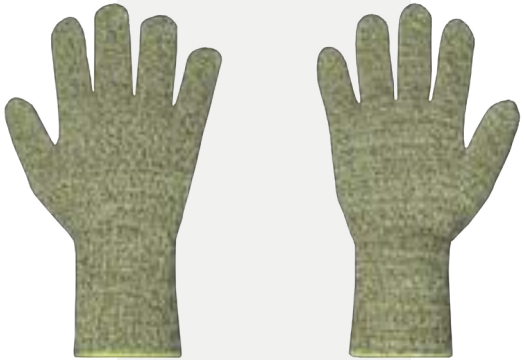

Maximum ANSI 5 heat resistance and moderate cut protection in a thicker 7-gauge knit for more cushioning and increased durability plus synthetic lining for added comfort

COOL GRIP® SKX-W | L - 2XL

Maximum ANSI 5 heat protection in a thicker 7-gauge knit for more cushioning and increased durability plus knit wool liner

COOL GRIP® SKX-W4 | S - XL

Maximum ANSI 5 heat protection and cut resistance in a thicker 7-gauge knit for more cushioning and increased durability plus knit wool liner and extended 4" cuffs for wrist safety

CONTENDER™ TCKVLO | S - 2XL

Moderate cut protection and ANSI 4 heat resistance in a thicker 7-gauge knit that absorbs grease and oil to help maintain grip

DEXTERITY® S13KF | 6 - 11

With moderate cut resistance and ANSI 2 heat protection in a thinner 13-gauge knit

ANSI A4 CUT | 360° CUT | ANSI 3 ABRASION | ANSI 2 HEAT | **MADE IN THE AMERICAS**

Low Cut

What you need to know about low cut protection

Gloves and sleeves that provide low cut resistance are designed for tasks such as light material handling and tasks that require general use gloves.

When looking for low cut protection levels on gloves, look for the following ANSI cut levels represented by the following icons:

Low Cut Protection **String Knit**

LOW CUT PROTECTION | STRING KNIT With Palm Coating

DEXTERITY® S18KGFN | 5 - 11

Ultra-thin silicone-free cut-resistant gloves with foam nitrile palm coating for better wet grip

MADE IN
THE AMERICAS

DEXTERITY® S13PNT | 6 - 11

Cut-resistant knit gloves with foam nitrile palm coating for better wet grip

TENACTIV™ S13TAFGPU | 5 - 12

Comfortable cut-resistant gloves with polyurethane palm coating for better dry grip

TENACTIV™ S15TAFGPU | 5 - 12

Thinner cut-resistant string knit gloves with polyurethane palm coating for better dry grip

TENACTIV™ S13TAGPU | 5 - 12

Cut resistant with non-marring polyurethane palm coating for better dry grip

TENACTIV™ S13TAPUCF | 5 - 12

Cut protection with static-blocking properties and polyurethane palm coating for better dry grip

SUPERIOR TOUCH® S13SXPU | 6 - 12

Cut-resistant gloves made with Dyneema® plus polyurethane palm coating for better dry grip

SUPERIOR TOUCH® S13SXPUQ | 6 - 12

Cleanroom-processed low-lint gloves that protect against cuts, made with Dyneema® plus non-marring polyurethane palm coating for better dry grip

SUPERIOR TOUCH® CS13SXPUQ | 6 - 12

Cut-resistant low-lint gloves made with Dyneema® plus non-marring polyurethane palm coating for better dry grip

SUPERIOR TOUCH® S13SXGPU | 5 - 12

Food safe low-lint gloves that protect against cuts, made with Dyneema® plus polyurethane palm coating for better dry grip

Puncture

What you need to know about puncture protection

Puncture-resistant gloves and sleeves prevent injuries caused by pointed objects that penetrate the skin. There are two ANSI standards for puncture protection: hypodermic puncture and probe puncture.

Hypodermic puncture protects against injuries from objects that can easily penetrate the skin such as syringes, fine wood splinters, tiny pieces of glass, thin gauge wire, construction staples, and other hypodermic hazards.

A probe puncture injury is more blunt and can be as thick as a ball-point pen. This includes injuries from objects such as nails, thick cables, wood splinters, wires, and other hazards.

The following gloves in this section include hypodermic protection and the industry's maximum probe puncture protection. When looking for puncture protection levels on gloves, look for the following icons :

Puncture Protection

Hypodermic

PUNCTURE PROTECTION | HYPODERMIC
String Knit

TENACTIV™ STAGLXPB | 6 - 11

DPL
9 1/2 ANSI / ASTM CLASS 00 D120 TYPE I
MAX USE VOLT 500V AC

High Voltage

What you need to know about high voltage protection

Rubber insulating gloves and leather protectors are designed to protect workers from energized equipment and other electrical hazards. All of our high voltage rubber gloves are tested and certified at time of order to extend their shelf life.

There are two ratings for high voltage gloves: Class and Type.

Class indicates the maximum use voltage. Rubber insulating gloves are classified by the voltage and insulate hands to protect them from shocks. We offer a range of products from Class 00 to Class 2. We also offer leather cover gloves to protect the rubber insulating gloves.

Type indicates whether the glove is ozone resistant or not. Ozone can compromise rubber, causing cracks and compromise the integrity of the glove. Currently all of our gloves are Type I and are not ozone resistant.

Class	Maximum Use Voltage (AC)	Type	Ozone Resistance
00	500V	Type I gloves	No
0	1,000V	Type II gloves	Yes (not sold by Superior Glove)
1	7,500V		
2	17,000V		
3	26,500V		
4	36,000V

CGB22 | ONE SIZE

22" long cotton canvas bag featuring 2 compartments for storing rubber electrical gloves
Features Velcro enclosure and clip belt attachment for convenience

Improper storage can significantly impact the integrity of electrical safety gloves. When not in use, ensure they are kept in a cool, dry place and are not folded or bent out of shape. Keep out of excessive heat, sunlight, humidity, ozone, and chemicals or substances that could damage the rubber. This will help to extend the longevity of each pair of gloves.

Fire Resistant

What you need to know about fire resistance

Fire resistant (FR) material is designed to resist flame exposure. FR items are either treated to resist flame or made from materials that are inherently fire resistant.

Our FR products are tested to ensure compliance with industry standards. When looking for FR products, look for the following icons:

ASTM
D6413

ARC FLASH
4 cal/cm²

ARC FLASH
8 cal/cm²

ARC FLASH
25 cal/cm²

ARC FLASH
40 cal/cm²

**Fire resistant
multi-hazard
protection**

4 PRO
superior

ENDURA® 378GKG4P | S - 3XL

These FR gloves feature maximum impact protection, high cut resistance, and arc flash protection. Treated to resist water and liquids that can degrade the material and present safety issues. Padded palms enhance comfort.

SUPERA™ FR180ST | S - 5XL

Ultra lightweight and inherently fire-resistant light blue shirt made with sweat-wicking, non-irritating stretch material and upper back vents to keep cool and comfortable

Key Features

- FR mesh vented back for added cooling
- Button down collar
- Front closure: buttons
- Storage: 2 chest pockets with flap and button closure
- Cuffs with buttons for adjustment
- Extra long shirt tail (sizes 2XL - 5XL)

Available Sizes

- Regular | S - 5XL

Fire Resistant

Sleeves & Socks

CONTENDER™ KAWC | ONE SIZE

Double-layered sleeves with low cut protection that resists sparks and melting

6", 9", 10", 12", 14", 18", 22", tubular cut, available with or without thumbhole

CONTENDER™ KPXT | ONE SIZE

Made with double-layer Protex® known to resist sparks and melting plus protection against low cut hazards and inner bicep elastic and grip to stay in place

14", 18", 22", tapered cut, available with or without thumbhole

CONTENDER™ PXN/KG18 | S/M - L/XL

Arc flash-rated sleeves with high cut protection and inner bicep elastic and grip to stay in place

18", tapered cut

SUPERA™ SXKVFR | M - XL

Inherently fire-resistant socks for comfort and protection against flames

Heat

What you need to know about heat protection

Heat-resistant gloves and sleeves protect against burn injuries when working with hot objects or surfaces.

These are generally rated by the highest contact temperature at which the:

- Time to 2nd degree burn is over 15 seconds
- Time heat is noticeably painful to the average person is over 4 seconds

When looking for heat protection levels on gloves, the ANSI heat level is represented by the following icons and temperatures:

				
HEAT	HEAT	HEAT	HEAT	HEAT
80°C 176°F	140°C 284°F	200°C 392°F	260°C 500°F	>320°C >608°F

What you need to know about chemical protection

Chemical gloves are made with materials that resist liquids and fluids as well as chemical degradation.

The best way to choose the right gloves is to identify the chemical being handled and match it to the glove material that resists that chemical. For this, you can ask an expert or consult your chemical SDS (safety data sheet).

Disposables

What you need to know about disposable protection

Disposable protection is ideal for single use to prevent cross-contamination. When looking for food safe disposable protection, look for the following icon:

If you are looking for disposable protection for medical use, products must be approved as Class II Medical Devices by Health Canada for Canadian products and the FDA for use in the USA. Look for products marked “medical grade” or “for medical use.” Products marked as “industrial grade” or “industrial use only” are not suitable for medical use.

Disposables **Food Safe**

KEEPKLEEN® RDNMD | XS - XL

General Use

What you need to know about general use gloves

Gloves that appear in this section offer protection against minor hazards. They are designed for workers involved in low-risk tasks such as light assembly and inspection work with limited exposure to safety hazards.

Any protections offered by items in this section are represented with hazard icons. As in other sections, these have been tested against industry standards.

Cold

Why Superior Glove for cold protection

Our cold protection products are extensively tested in-house to enable us to maximize warmth and range of motion in winter conditions. Our line also incorporates protection against other hazards such as cut, impact, puncture, abrasion, arc flash, and heat.

Cold Protection Explained

Cold protection on our products is represented by the following icon that clearly communicates the lowest temperature rating established by laboratory results.

-45°C

Sleeves

What you need to know about arm protection

Sleeves that appear in this section are designed to provide arm protection.

Any protections offered by items in this section are represented with hazard icons. As in other sections, these have been tested against industry standards.

Descriptions of each sleeve style are paired with charts that provide variations available for each sleeve.

Sizing Guides

Shirts / Jackets

Measure the widest part of the chest - approximately 1-3 inches (3-10cm) below the armpits. Allow for 2 finger width space between chest and measuring tape for a more comfortable fit.

Use this measurement to select the corresponding garment size. If measurement is between sizes, select the larger size.

S	34-36 inches / 80-90 cm	2XL	50-52 inches / 126-135 cm
M	38-40 inches / 91-101 cm	3XL	54-56 inches / 136-145 cm
L	42-44 inches / 102-112 cm	4XL	58-60 inches / 146-155 cm
XL	46-48 inches / 113-125 cm	5XL	60-62 inches / 156-165 cm

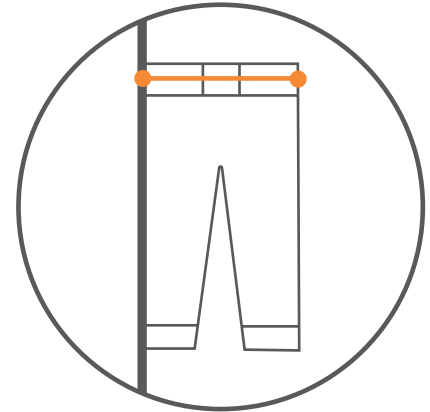

Pants

Measure the area around the waist. Allow for 2 finger width space between waist and measuring tape for a more comfortable fit.

Use this measurement to select the corresponding garment size. If measurement is between sizes, select the larger size.

S	30-32 inches / 71-78 cm	2XL	42-44 inches / 100-110 cm
M	34-36 inches / 81-91 cm	3XL	46 inches / 110-115 cm
L	38 inches / 91-100 cm	4XL	48 inches / 115-120 cm
XL	40 inches / 91-100 cm		

Inseam Lengths

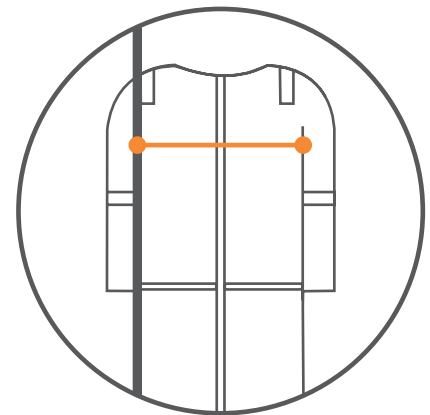

Regular: 32 inches / 81 cm | Tall: 36 inches / 92 cm

Coveralls

Measure the widest part of the chest - approximately 1-3 inches (3-10cm) below the armpits. Allow for 2 finger width space between chest and measuring tape for a more comfortable fit.

Use this measurement to select the corresponding garment size. If measurement is between sizes, select the larger size.

S	38 inches / 96-100 cm	2XL	52-54 inches / 131-141 cm
M	40-42 inches / 100-110 cm	3XL	56-58 inches / 141-151 cm
L	44-46 inches / 110-120 cm	4XL	60-62 inches / 151-161 cm
XL	48-50 inches / 120-130 cm		

Inseam Lengths

Regular: 30 inches / 76 cm | Tall: 32 inches / 81 cm

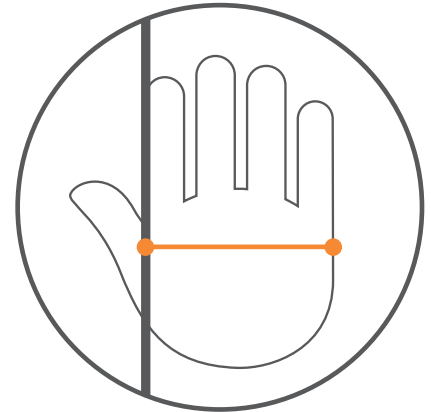

Gloves

A proper fit is extremely important. An uncomfortable fit causes hand fatigue and ultimately could lead to a potential workplace hazard.

Measure the width of your hand one inch below the base of your first finger and across your knuckles.

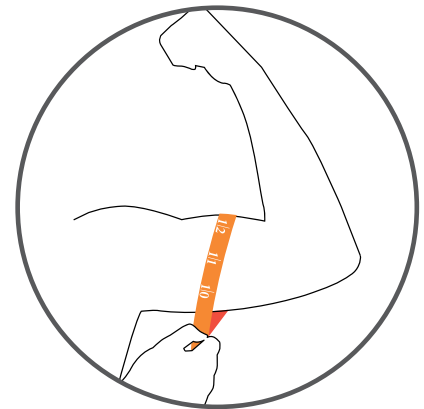

5 / 2XS	2.75 inches / 68 mm	9 / L	4 inches / 105 mm
6 / XS	3 inches / 76 mm	10 / XL	4.5 inches / 113 mm
7 / S	3.25 inches / 84 mm	11 / 2XL	4.75 inches / 123 mm
8 / M	3.75 inches / 94 mm	12 / 3XL	5.25 inches / 134 mm

Sleeves

To find the best fit, measure the circumference of your bicep and choose corresponding sleeve size according to the chart below.

2XS	9.75 inches / 250 mm	L	11.5 inches / 295 mm
XS	10.25 inches / 260 mm	XL	12.25 inches / 310 mm
S	10.5 inches / 270 mm	2XL	12.75 inches / 325 mm
M	11 inches / 280 mm		

Sleeves are available in multiple lengths.

For a more natural fit, sleeves come in a tapered version which provide better comfort and staying power. Tapered sleeves are designed to fit the contours of your arm and won't lose shape due to stretching

(Tapered)

(Tubular)

Quick Fit Tips

A good fit is important for comfort and protection. Our measurements offer a starting point, but personal preference is key.

Clothing should fit comfortably without excessive bunching when moving. It shouldn't be too loose or too tight as that can effect the safety performance.

Cleaning Instructions

Acrylic

Wash in cold water (85°F / 30°C) | Tumble dry low heat | Safe to bleach

Chemical

Rinse in water and mild detergent | Reverse to dry inner liner

Cotton

Wash in cold water (85°F / 30°C) | Tumble dry low heat | Safe to bleach

Leather

Dry-clean | Do not bleach

MetaActiv™

Wash in hot water (170°F / 75°C) | Tumble dry high heat | Do not bleach

Nylon

Wash in warm water (105°F / 40°C) | Tumble dry low heat | Safe to bleach

ParaActiv™

Wash in hot water (170°F / 75°C) | Tumble dry high heat | Do not bleach

Polyester

Wash in warm water (105°F / 40°C) | Tumble dry low heat | Safe to bleach

TenActiv™

Wash in cold water (85°F / 30°C) | Tumble dry low heat | Safe to bleach

Wool

Wash in warm water (105°F / 40°C) | Tumble dry low heat | Safe to bleach

Mixed materials

For safety gloves with mixed materials, give preference and accommodate for the following:

- Do not use high heat for thermoplastic materials like HPPE, nylon, and polyester
- Do not use bleach or high heat for gloves with hypodermic puncture protection
- Dry clean gloves with leather

Palm coated

Disregard palm coating | Follow the cleaning instructions for other materials the glove contains

superiorglove®
